

Requirements and Services on a glimpse

Suppliers

Suppliers have to declare presence / absence of hazardous materials in their products in form of Material Declaration (MD) and Suppliers Declaration of Conformity (SDoC). We identify and implement efficient processes for exchange with your supply chain ensuring proper preparation & maintenance of documents and avoiding liability issues.

Shipyards

Shipyards have to collect MDs and SDoCs from their suppliers for preparing the Inventory of Hazardous Materials (IHM). Data management, gathering of documents, education of suppliers, management of gaps, and avoiding claims from Shipowners are challenges we take care of for you.

Ship Recyclers

The “green recycling market” grows and we identify the most efficient options for HKC- / EU-compliance in line with local conditions and individual preferences. We combine compliance with productivity for ensuring that investments lead to competitive advantages and a first class certification. Our year-long experience in this special market ensures your entry and expansion in this growing market segment.

Shipowners

IHM Development: A huge number of ships and platforms need an IHM until end of 2020. As one of the most experienced IHM-Experts we develop high-quality IHMs effectively which are compliant in every detail. Our global network (US, EU, Russia, China, South Korea, India) provides the needed expert capacity. Using newest technology increases efficiency, reduces prices and support IHM-maintenance in an unmatched way.

IHM-Maintenance: Once prepared the IHM has to be maintained. We help owners to identify and implement the most suitable approach and also overtake the entire task.

Recycling Projects: We prepare ships for responsible recycling, identify appropriate recycling yards, support contracting, provide full-time supervision and guidance to all involved during the recycling process. It is a special market and we know the right players. This ensures safe and sound ship recycling, avoids intermediates and guarantees that all requirements are met. We take care of your responsibilities.

Trainings

We offer a huge variety of accredited trainings & seminars around HKC and EU-SRR and are happy to accommodate your individual needs. Please get in touch with us.

Background

The “Hong Kong International Convention for Safe and Environmentally Sound Recycling of Ships” (HKC, 2009) of IMO and EU Ship Recycling Regulation (EU-SRR, 2013) apply to the entire maritime industry from cradle to grave.

Suppliers, Shipyards, Shipowners, and Ship Recycling Facilities are facing challenges when implementing these new requirements. Key aspects are identification of hazardous materials (IHM), HSE aspects of recycling operations (SRFP), recycling planning of a ship (SRP) and all related certifications.

Now it is time to prepare as demand increases sharply and expert capacities are limited. Early implementation and involving experts gives you the advantage that compliance is achieved within the deadline at a reasonable cost.

Why GSR Services?

Requirements keep changing and GSR Services (Green Ship Recycling Services) has always been at the forefront of all developments. The vast experience is based on R&D, participation in technical and legal forums, understanding stakeholders' demands, openness and looking beyond boundaries - from cradle to grave. Thorough understanding of requirements paired with innovative ideas, unmatched technical & legal know-how and customer orientation ensures that our services are delivered most efficiently.

Our approach ensures compliance, is socially responsible, and effective. GSR does not compromise on quality and is the trusted partner of the shipping and ship recycling industry.

More than a decade of innovations, solutions and trust.

Our Services

- MD & SDoC preparation for suppliers
- IHM-Preparation for new & existing ships
- IHM-maintenance
- Preparation for legally compliant ship recycling for owners & facilities
- Supervision of ship recycling projects
- HKC-Compliance for ship recyclers
- Trainings & Seminars and much more.

We deliver quality - only
