## Cruising with IHM-Compliance

Cruise vessels are complex and their IHM-Maintenance can be challenging. Norwegian Cruise Line, Oceania Cruises and Regent Seven Seas Cruises have selected GSR Services to take care of the obligatory IHM-Maintenance for their entire fleets.

GSR checks all purchase orders, identifies relevant order items and requests documents for those from suppliers. Received documents (MDs & SDoCs) are reviewed and if presence of hazardous materials is declared the crew gets clear tasks. All transparently reflected in Maintenance-Reports and amended IHMs, available 24/7/365 for EU-PSC and Class.

GSR sets the benchmark for IHM-solutions by applying Compliance Data Exchange Principles & Industry IHM-Guidance. Cruising is even more relaxed when GSR takes care of IHMs!
